INTRODUCTION

IN PUP-PARANAQUE, MANY STUDENTS UNAWARE OF THE HAPPENING EVENT INSIDE THE CAMPUS. TO TACKLE THIS ISSUE, WE HAVE IMPLEMENTED A SYSTEM TO ENSURE THAT ALL STUDENTS ARE INFORMED ABOUT THE EVENTS AND ACTIVITIES HAPPENING ON CAMPUS.

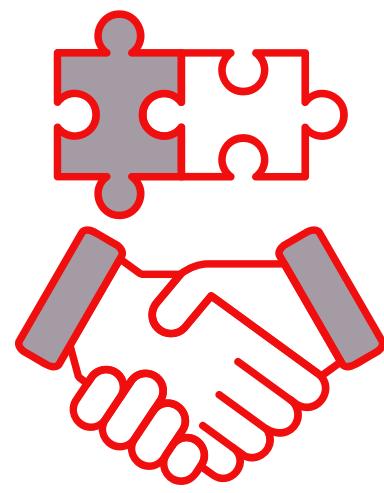

PROBLEMS ENCOUNTERED AND NEEDED

SOLUTIONS IMPLEMENTED

Regular Updates

Event Calendars

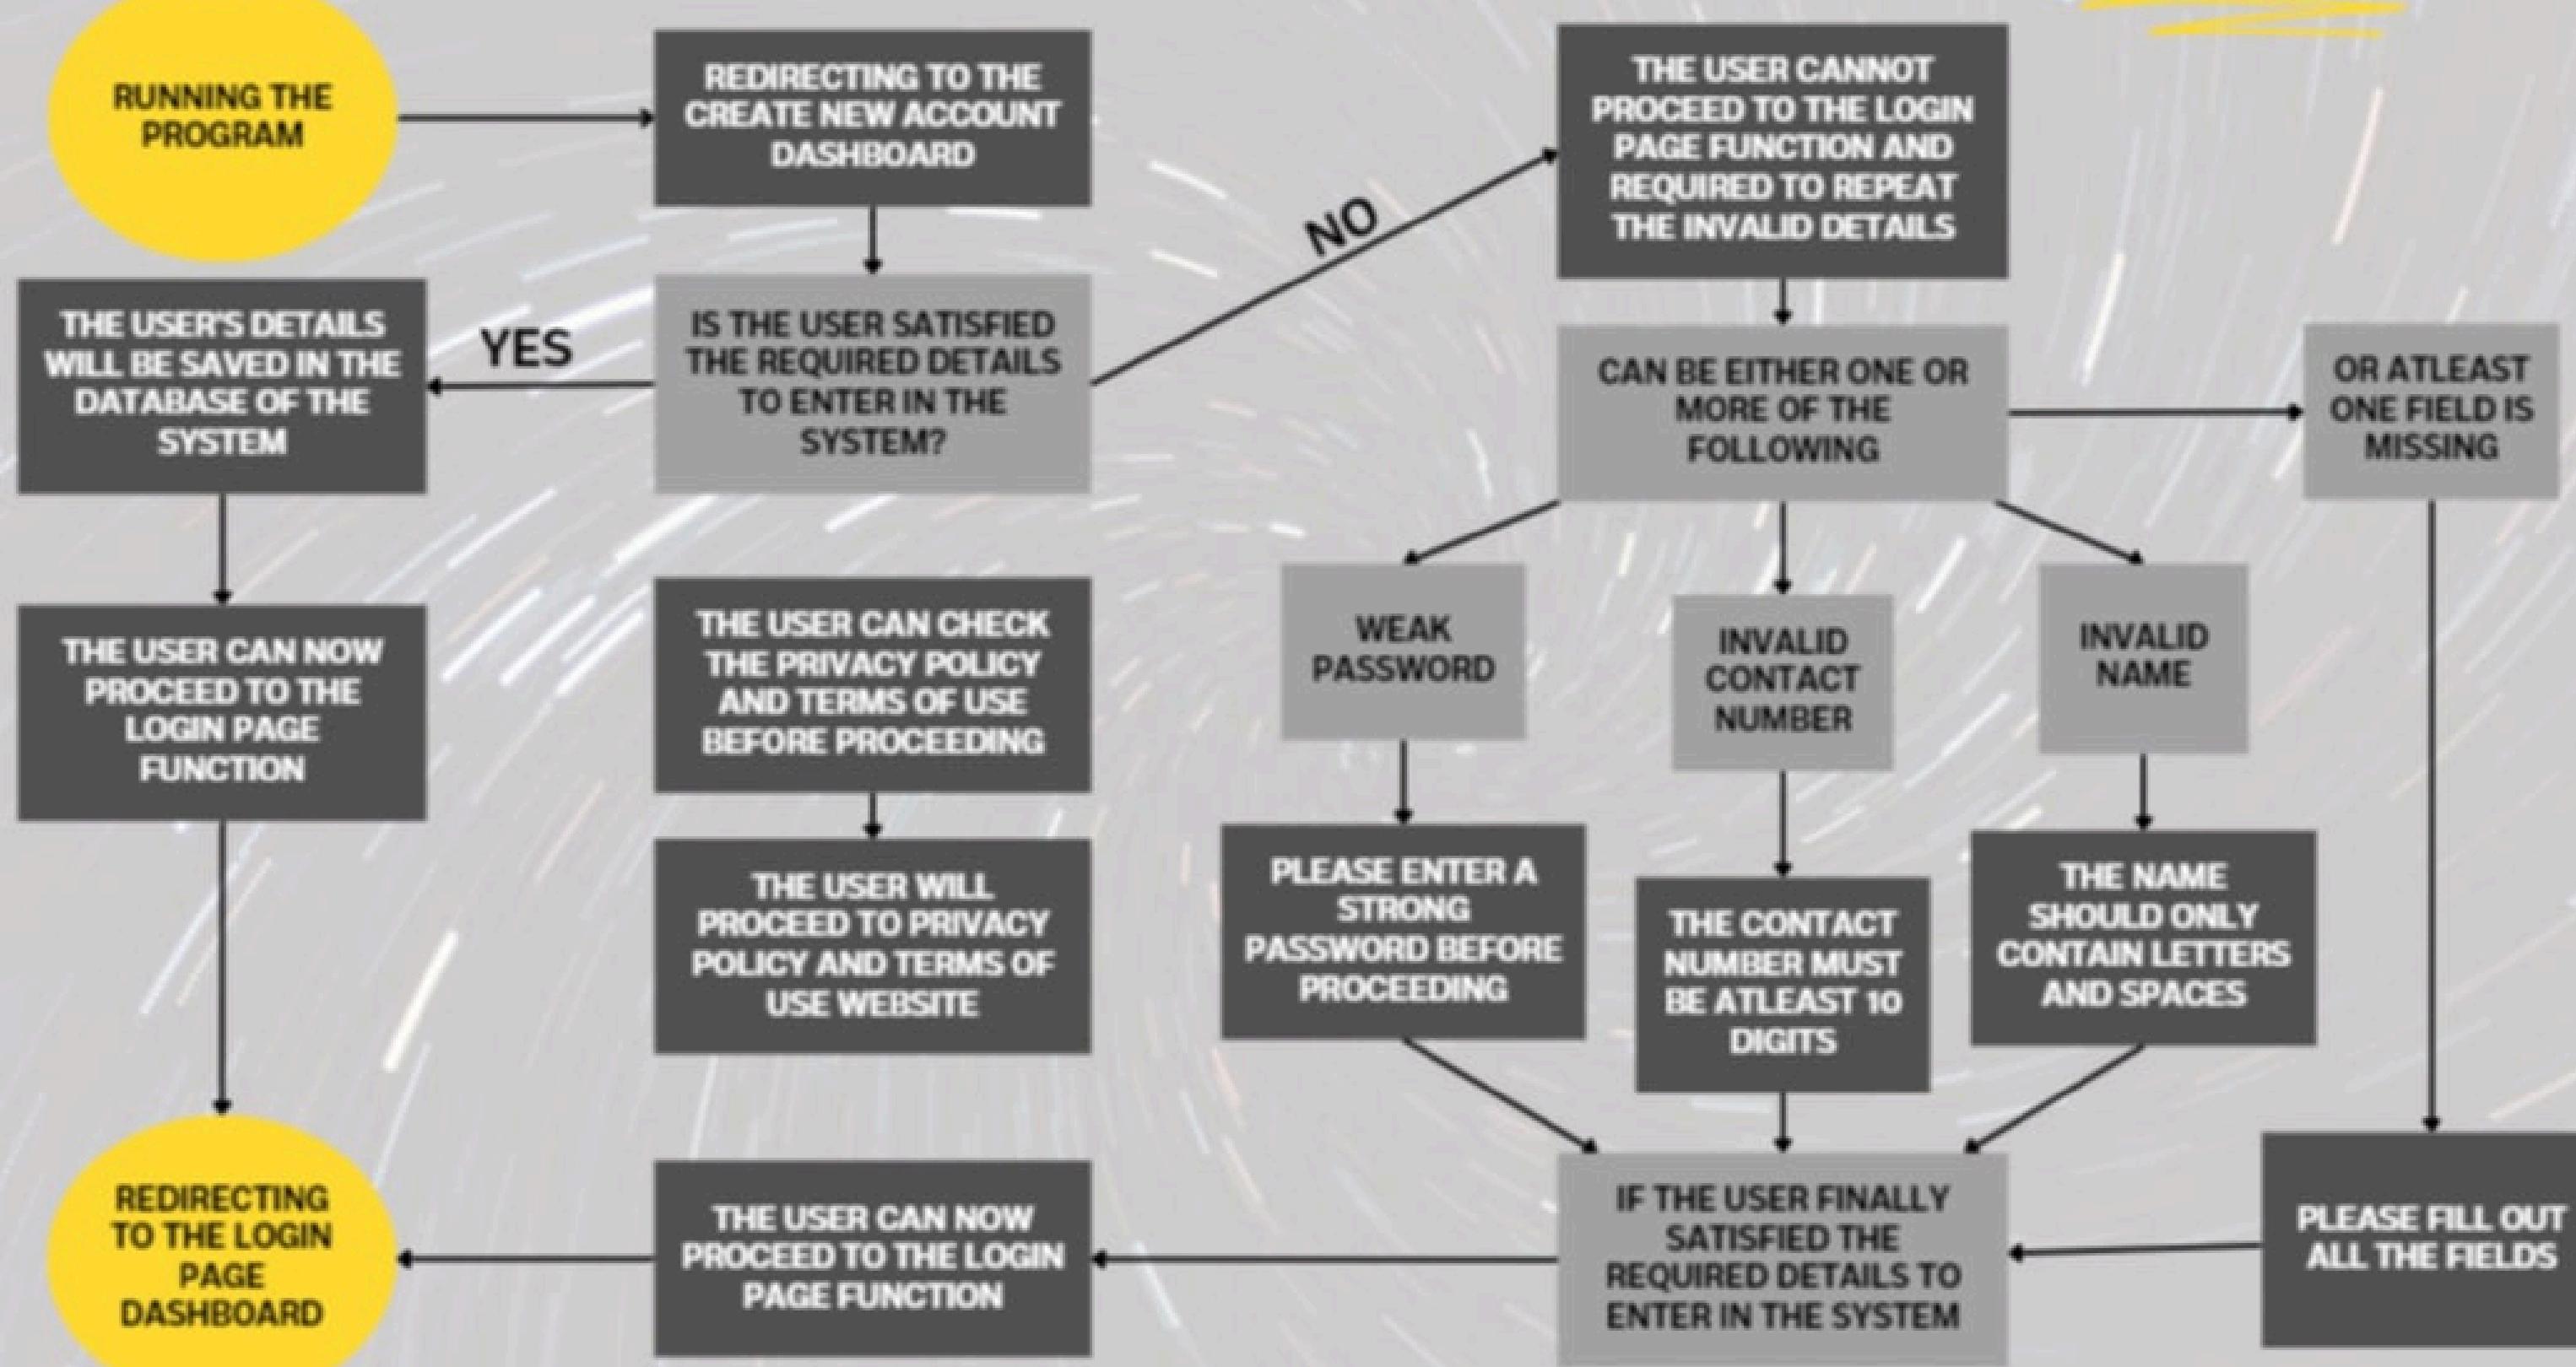

Integration with Curriculum

Features

- *Creation of the Account*
- *Login Functionality*
- *Main Dashboard(Event Sorter/Management and Customizable*
- *Database System*

SYSTEM FLOWCHART

THE P.U.P.P.E.T. SYSTEM FLOWCHART (CREATING NEW ACCOUNT FUNCTION)

ETHICS

In developing the P.U.P.P.E.T application, the Group 3 Trojan Geeks applied the ethical principles of fairness, inclusiveness, and responsibility. We started with accessibility, including features such as profile customization, color contrast adjustments, and audio settings. This makes sure that our application is all-inclusive for all users with different abilities since there is equal opportunity for everyone to benefit from the platform. We also ensured user privacy and data security in the design of the application. We implemented login systems, form validation, and input handling to ensure no breaches or misuse of any sensitive user data.

Our development approach also shows ethical accountability. Bug testing and quality assurance were planned, along with routine updates to ensure a product that was dependable and completely transparent. Features such as real-time event updates and constant UI navigation, too, ensured that there was no frustration for users and, in turn, increased trust in our product. Lastly, the site avoids bias in its functionality because it caters to a large audience, from students to event organizers and even other users. In this regard, we are creating a platform that is both ethically responsible and impactful in the needs of users.

USER-STORIES AND ACCEPTANCE CRITERIA

1.

Epics and User Stories with Acceptance Criteria

Epic	User-Stories	Acceptance Criteria
Student Access	As a student, I want to be able to access the app in order to see the planned events, so that I won't miss a thing	<ul style="list-style-type: none">Given: That I log in to my account successfully as a student.When: I can see the planned eventsThen: I am able to know the planned events and I won't miss any planned events that will be held.
Time Management	As a busy student, I need a way to schedule my time effectively, so I can manage both work and school commitments.	<ul style="list-style-type: none">Given: That the user should be able to set reminders for tasks.When: I can see other options to set reminders.Then: I am able to set my reminders and manage my time effectively
Application Convenience	As a user, I want to have a seamless experience while navigating the app, ensuring that I can easily find the features I need.	<ul style="list-style-type: none">Given: That the user can use the app easily with no complicationsWhen: I look for specific features or information.Then: I can quickly locate what I need without confusion.
Event Organizer	As a student event planner, I want to sort, create and manage event schedules, so I can plan and execute events efficiently.	<ul style="list-style-type: none">Given: I am logged in as a student event planner.When: I click on the "Create Event" button.Then: I should be able to organize, set events easily.
UI Consistency	As a user, I want to navigate the event organizer platform easily and intuitively, regardless of	<ul style="list-style-type: none">Given: I am on any page within the event organizer platform.When: I navigate to a different section (e.g., Events, Attendees)Then: The navigation menu should remain consistent.

USER-STORIES AND ACCEPTANCE CRITERIA

	which section I'm in, so I can find the information I need quickly.	
Updated information	As a user, I want to see updated information on the event page, so that I can plan for possible changes.	<ul style="list-style-type: none">• Given: A user receives an update notification.• When: The user clicks the notification.• Then: Then they are sent to the event page, which has the new information highlighted.• Given: The venue for the event has been updated by the organizer due to some unexpected circumstances.• When: A user visits the event page.• Then: The new and updated details should be shown, replacing the previous one.
Organized settings functionality	As a user, I want to be able to adjust settings such as my profile picture, color contrast, and audio settings functionality.	<ul style="list-style-type: none">• Given: A user is accessing the system.• When: The user navigates to the accessibility settings section.• Then: The user should be able to change their profile picture, provide a clear visual representation of the chosen color theme, can adjust the audio settings functionality and all interactive elements should be properly labeled and accessible to screen readers.
User-friendly	As a user, I want to have a positive and enjoyable experience with the system, feeling confident, empowered, and satisfied with its functionality	<ul style="list-style-type: none">• Given: A user is interacting with the system.• When: A user interacts with the system's features and functionalities.• Then: A user feels satisfied with their experience using the system, finding it enjoyable and rewarding.
